**DESCRIPTION / JUSTIFICATION:**

The FY 2012-13 Appropriations Act included funding for expansion of community-based services. The Act assumed that this expansion would ramp-up steadily over the course of the biennium. As a result, the estimated number of individuals in August 2013 will exceed the average monthly number of individuals served in FY 2012 or FY 2013. However, the instructions for determining the baseline General Revenue (GR) funding limit for FY 2014-15 is based upon the two-year average GR level for FY 2012-13, which is insufficient to fund the number of individuals served in August 2013. An additional \$9.1 million GR is needed to maintain services at August 2013 levels.

**DESCRIPTION / JUSTIFICATION:**

The LAR 2014-2015 instructions state that rate increases, cost inflation, utilization, and acuity should be shown as exceptional items and should not be included in the base request. Even without rate increases, we are experiencing increases in the average cost per individual served in many programs as the result of increased utilization or acuity.

The department has limited ability to control these cost increases. Without additional funding, we will be able to serve fewer individuals in the waiver programs, and we will experience deficits in the entitlement programs.

**DESCRIPTION / JUSTIFICATION:**

Funding under this item would serve approximately 400 slots at Large Intermediate Care Facilities (ICF) and State Supported Living Centers (SSLC), 192 slots for Department of Family and Protective Services (DFPS) children aging out of foster care, 400(300 HCS and 100 CBA)crisis slots for persons at imminent risk of institutionalization and 360 slots for the diversion of IDD from Nursing Facilities.

**EXTERNAL/INTERNAL FACTORS:**

Under the Promoting Independence initiative, the department's commitment is to make community waiver placements available for residents within one year of the date of referral for community placement.

This item if not funded, would eliminate the department's ability to meet the requirement and consumers would remain in environments that are more restrictive than necessary.

Residential options are limited for children with developmental disabilities whose conservatorship ends with The Department of Family and Protective Services. This item seeks funding for slots to provide the necessary resources for their continued care.

This item also seeks to prevent institutionalization, specifically for those on the interest list with imminent risk of institutionalization associated with their disability. It seeks to provide less restrictive environments through waiver services for these individuals in response to caregivers aging out, in poor health, or passing away.

**DESCRIPTION / JUSTIFICATION:**

This item continues DADS' efforts to increase services for community programs that maintain interest lists. For HCS and CLASS, funding would serve 20% of the estimated number of eligible individuals on the interest lists who would likely accept services. For CBA, MDCP, Texas Home Living, STAR+PLUS CBA individuals above the SSI level, In Home and Family Support, Title XX services, and IDD Community services, this item requests funding to increase services levels by 10% over FY 2012-13 levels. The request includes funding for acute care, drug and administrative costs at HHSC, as well as long term care and administrative costs at DADS. In addition to the increase above, this item requests funding for a new Community First Choice (CFC) program. Federal law now gives states the option to provide Medicaid State Plan home and community based attendant services, habilitation and personal emergency response services in exchange for a 6% enhanced Federal Medical Assistance Percentage (FMAP). Under federal statute, individuals eligible for CFC must already be eligible for Medicaid under the state plan and meet an institutional level of care. Implementation is anticipated in 2015.

Currently, Texas provides up to 50 hours per week of attendant care to adults with physical disabilities under its Medicaid state plan through the Primary Home Care (PHC) and Community Attendant Services (CAS) programs. No analogous state plan program exists for individuals with intellectual and developmental disabilities (IDD). With CFC, adults with a primary diagnosis of IDD, who are currently eligible for Medicaid but are not receiving attendant care services, would have access to attendant care, habilitation and personal emergency response services through the state plan. This option may reduce the need for waiver type services and may also result in diversion from costlier institutional settings by providing these basic services in the individual's home.

**EXTERNAL/INTERNAL FACTORS:**

This item will be impacted by the expansion of STAR+PLUS managed care. A \$7.2 million "premium" tax of IDD expenditures will not be included as revenue earned at DADS.

16,628 individuals will be served as a result of the Interest List exceptional item at a cost of \$525 million All Funds \$223.7 million GR

11,902 individuals will be served in FY 2015 as a result of the Community First Choice (CFC) Program at a cost of \$ 371.4 million All Funds, \$35.8 million GR

**DESCRIPTION / JUSTIFICATION:**

DADS seek additional funding to increase efforts to protect the health, safety and welfare of individuals receiving services in two categories:

Funding is requested to increase FTEs by 44.5 and 50.5 in FYs 2014 and 2015 respectively. These FTEs would increase the Guardianship program, Assisted Living Facility Ombudsmen (ALFO), Regulatory Certification of Day Habilitation (RCDH) providers, and Regulatory Waiver Survey & Certification Program Reviewers. Increasing the Guardianship program by 11 FTEs will continue to meet the needs to individuals referred by Department of Family & Protective Services (DFPS), Child Protective Services (CPS), Adult Protective Services (APS) and Probate courts. Expanding the Long-Term Care Ombudsmen Program by one FTE and contracting 28 ALFO would increase protection and advocacy for people living in Assisted Living Facilities (ALFs). Adding 18.5 FTEs to RCDH providers will increase oversight of day habilitation services while

	<p>minimizing cost to providers. DADS evaluated the possibility of certifying providers of day habilitation services that receive HCS, ICF/ID or TxHmL reimbursement. DADS is experiencing significant workload issues with completing reviews of provider contracts funded with Home and Community Service (HCS) and Texas Home-Living (TxHmL) waiver programs and is requesting 20 additional FTEs.</p> <p>The Automation Modernization System would upgrade automation systems that are slow, unstable and inadequate to sustain DADS' daily operations including the Compliance, Assessment, Reporting and Enforcement (CARES) and Home and Community Services System Application (HCSSA). This will result in a single consolidated application with a single repository for data and reports. Regulatory Services proposes to implement Geographic Information System software allowing DADS to track and monitor investigator locations, make field assignments, collect and report findings using tablet and web-based technology.</p> <p><b>EXTERNAL/INTERNAL FACTORS:</b></p> <p>Funding of 11 FTEs for the Guardianship program will continue to meet the needs of individuals served. Failure to fund these FTEs will result in unmanageable caseloads, inability to ensure safety and welfare of wards, failure to meet legislative and Texas Certification Board expectations, and a decline in working relationships with courts, APS, CPS, elected officials, and valued stakeholders.</p> <p>Long-term care ombudsmen will increase the quantity and quality of services to people living in ALFs, provided through onsite visits. All licensed facilities would receive an annual visit and facilities in greatest need of frequent advocacy will be visited on a quarterly basis. With this increase, the program will increase staff from 56 to 84 FTEs and increase facility visits from 5,900 to 10,000 per year for each licensed ALF (currently 1,567 facilities).</p> <p>Certification and regulatory oversight of Day Habilitation providers is recommended. If this is not funded, there will be more allegations of abuse, neglect, or exploitation at locations listed as a day habilitation. Complaints are lack of staff training regarding an individual's behavior support plans, individualized medical needs, or increased supervision levels. Lack of training places the individual's health and safety at risk.</p> <p>The Waiver Survey and Certification Unit is at maximum capacity handling projected growth through FY 2013. With additional program reviewers, requirements for completion of initial and annual reviews and complaint investigations within specified timeframes should be achievable. This expansion would address continued projected growth. Without these positions, the ability to complete initial and annual program reviews as well as conduct follow-up investigations of complaints and allegations of abuse, neglect and/or exploitation will not be possible and persons receiving services through waiver programs will not be afforded their necessary and required protections.</p>

**DESCRIPTION / JUSTIFICATION:**

Streamlining Service Systems – DADS Single Service Authorization System – Phase II - The benefits of creating a DADS Single Service Authorization System and making system improvements to the SAS include: Consolidation of all consumer information/assessments into a common database, eliminating the possibility of duplicate enrollment in more than one DADS Medicaid 1915(c) waiver program; and enhanced capability for data inquiries, analysis, program comparison, and reporting. As part of the effort to create a DADS Single Service Authorization System for long-term services and supports, the Department has plans to integrate billing and payments processing for HCS and TxHmL into the Claims Management System operated by TMHP.

Phase II is intended to address all remaining CARE interface dependencies and usage, whether by redirecting interfaces and functionality to alternative data sources, or eliminating obsolete interfaces.

**EXTERNAL/INTERNAL FACTORS:**

The information technology initiatives requested in this item are in line with direction from HHSC on the needs for future integration of HHS hardware and software requirements. Having a compatible and up-to date information technology infrastructure will help to provide effective and efficient support to the programs under the agency's control.

**DESCRIPTION / JUSTIFICATION:**

DADS' Program of All-Inclusive Care for the Elderly (PACE) provides care by promoting the development of integrated managed care systems for the aged and disabled. PACE uses a comprehensive care approach, offering an array of services for a capitated monthly fee. PACE provides all health-related services, including in-patient and out-patient medical care, as well as a wide range of specialty services such as dentistry, in-home care, and transportation.

Currently, DADS operates three PACE sites, one in El Paso (Bien Vivir) one in Amarillo (Jan Werner) and one in Lubbock (La Paloma). They share a total of 1,170 slots.

There are two parts to this exceptional item. The first would add 24 additional slots for Amarillo, 24 additional slots for Lubbock, and 48 additional slots for the existing PACE locations. The second would add two new PACE sites funded to serve 150 clients each, to be phased in during FY 2015. At a cost of roughly \$3,000 per client, the price for PACE services is considerably less than that needed for more traditional care.

**EXTERNAL/INTERNAL FACTORS:**

Rider 44 of the DADS' General Appropriations act directed the department to increase the number of PACE slots to the 3 existing locations. This request is keeping in line with legislative direction to expand the PACE program.

The Texas State Data Center (TxSDC) was established in 1996 to provide a secure operational environment for agency data center services. With the passage of HB1516, Texas approaches data center services from a state-wide perspective to accelerate the process of data consolidation. The goals of data consolidation are simple:

Share resources to reduce costs while maintaining or improving services levels. To achieve these goals, Department of Information Resources (DIR) and IBM are leading this state-wide initiative to build a shared services data center system.

Today, HHS agencies effectively share global address lists or electronic calendars for most fundamental collaboration due to this project. The Messaging and Collaboration initiative has standardized email and other collaboration technologies across HHSC enterprise to improve collaboration capabilities, eliminate risks associated with continuing to operate in the old environment that was composed of disparate messaging systems that are quickly approaching the end of their useful life. This project supports the overall mission and objective of Health and Human Services (HHS) by effectively supporting business and enabling information sharing across organization boundaries through exploitation of current technologies. Furthermore, this project is aligned with development of a statewide shared technology infrastructure and other Service Oriented Architecture (SOA) standards adopted by HHS enterprise.

This project would update one tool used to help manage the MFP program – the Abuse, Neglect and Exploitation (ANE) reporting system. DADS and the Department of Family and Protective Services (DFPS) recently completed the ANE reporting system for reporting on ANE for consumers in the 1915 (c) waivers. DADS operates the waivers; however, DFPS investigates ANE allegations and completes the process of actions or referrals. DADS and DFPS now share ANE data for investigations concerning people receiving services from DADS.

**General Information**

Improvements to the DADS contract monitoring system will enhance MFP performance reporting and in-house analysis capability, allowing for a more robust data collection system and future in-house quality assurance enhancements to the Texas Demonstration.

Texas received technical assistance for Medicaid waiver performance reporting and determined specific changes to these tools for data collection. Changes are needed for: the addition of data entry rows and columns to accommodate new data requirements; maintenance and creation of data verification business rules in order for some entries to meet current standards; and the renaming of some worksheets to clarify availability for print. These changes will affect the spreadsheets, the automated transfer of the data from the spreadsheets to the database, and the database holding the results.

**PROJECT DESCRIPTION**

**General Information**

- QAI Data Mart Database functionality enhancements: The QAI Data Mart produces standardized reports and has the capacity to generate ad hoc reporting of provider performance and consumer outcome data. DADS IT and Team for Texas (T4T) administer the QAI Data Mart Oracle database. T4T wants to change the account permissions processes. This project includes an assessment of the changes needed in the QAI Data Mart to meet new account permission standards for the State of Texas. The assessment is needed to ensure any new permission standards will not significantly disrupt reporting requirements for the MFP. This effort also includes database performance review and adjustment to improve the speed of meeting requests for reports after the implementation of new account permission standards.
- Upgrade Relocation Contractor Database and reporting: Relocation contractors now report relocation data and financial information in an Excel spreadsheet and mail the information to DADS. The upgrade to the Relocation Contractor Database allows input by relocation contractors, places the data into a multi-user database, and allows for the tracking of budgets and financial transactions. The new system will provide the capability to analyze relocation outreach programs, successful/unsuccessful relocations from nursing facilities, and returns to institutions.

Regulatory Services has many outdated large and small applications and spreadsheets that staff use daily to perform their work functions, including the Compliance, Assessment, Reporting and Enforcement (CARES), Home and Community Services System Application (HCSSA). To address this inefficient use of technology and staff time, Regulatory Services and DADS Information Technology (IT) are currently working on a project that will identify all of the Microsoft (MS) Access database and associated spreadsheets, and applications currently used in Regulatory Services (to include those in Regional Offices). Once identified, all of the systems will be included in requirements gathering and implementation of one roles-based system for Regulatory Services.

**PROJECT DESCRIPTION**

**General Information**

Regulatory Services performs investigations and surveys of long term care facilities to protect people who live in Texas. To increase their presence in the field, time to respond, to track locations and make timely assignments, DADS proposes to implement Geographic Information System (GIS) software that allows Regulatory Services to track and monitor investigator locations, make field assignments, and additional software that allows the collection and reporting of findings on-the-spot using tablet and web-based technology. DADS will complete a pilot assessment by December 2012 and, if successful, will expand the operation to all regions across the state. It is anticipated this may result in travel savings. In addition, this technology is anticipated to improve on site response time, quality of services provided, provide central data for accurate reporting, reduce redundant documentation and report production, and to protect and secure confidential information. DADS also proposes to modernize declining systems used to gather and maintain critical information related to Regulatory Services' mission. Currently, essential and often confidential information is maintained in multiple Excel spreadsheets and Access databases transmitted across a wide area network. DADS proposes to develop a central database repository with roles-based applications for Regulatory Services staff to enter, analyze, and report on information essential for protecting people who live in regulated facilities.

**PROJECT DESCRIPTION**

**General Information**

Phase II will address all remaining DADS information dependencies and usage between the CARE mainframe system and Long Term Care Medicaid Information systems. This is necessary to eliminate dependence on outdated and obsolete information technology in the CARE mainframe system to a system that complies with the Centers for Medicare and Medicaid Services (CMS) Medicaid Information Technology Architecture (MITA) requirements. Phase II will also eliminate remaining DADS information dependencies from the CARE mainframe system for Long Term Medicaid services including but not limited to State Supported Living Centers (SSLCs), and the Quality Assurance Fee (QAF) program. The CMS MITA standards require that systems supported by Federal Financial Participation have the capability to share essential and necessary information with other State Medicaid systems. The CARE mainframe system does not have the ability to transmit this information in a form and manner the meets the CMS MITA standards. CMS has indicated that in the future that the state will not receive Federal Financial Participation for antiquated systems that do not meet MITA Standards. This means that future costs for maintenance of information dependencies with the CARE mainframe system may not be supported with Federal Financial Participation and would have to be completely supported with State General Revenue.

**PROJECT DESCRIPTION**

**General Information**

The American Recovery and Reinvestment Act (ARRA) provides substantial funding opportunities for physicians and other health providers in the adoption of Electronic Health Record (EHR) systems and to advance health information exchange. Funding this request addresses the gap between the current limited implementation of EHR and more robust, comprehensive, unified, and standardized implementation of EHR. Approximately 70 additional forms used in the SSLCs continue to be paper based. Using paper forms means a significant gap remains between the desired state of having electronic records and the current reality.

Funds will be used to Upgrade the Avatar software version certified by The Office of the National Coordinator for Health Information Technology Authorized Testing and Certification Body American Recovery and Reinvestment Act (ONC-ATCB ARRA) for existing Avatar modules. Deploy a pilot to one SSLC to test and solidify the process. Complete implementation in all (12) SSLCs managed by DADS.

Project number:	<b>20</b>	Project Name:	<b>Additional Computers for SSLCs</b>

**PROJECT DESCRIPTION**

**General Information**

It is recommended that additional computers be allocated into the PC Refresh Lease Baseline to help support expansion of the electronic recordkeeping system. Based on the individual high frequency use of application by a variety of staff and information gathered from the Department of State Health Services (DSHS) per their usage patterns at the State Hospitals, DADS would need six (6) additional computers per home, using an average home size of eighteen (18). Given that the homes vary in size, we would use the following as a baseline: One, (1) computer per every three (3) individuals served, with the current census being 3,827. Based on this census, SSLCs would need 1,276 additional work stations.

Reporting and documenting processes will become more efficient with the addition of computers at SSLCs. Service delivery will be enhanced with increased accuracy of documentation and reduced delay in reporting due to the need to share work stations.

Project number:	<b>21</b>	Project Name:	<b>Statewide Video Conferencing SSLCs</b>

**PROJECT DESCRIPTION**

**General Information**

In order to operate more efficiently, DADS needs to avail itself of the many advantages and benefits of videoconferencing. We are constrained by staffing levels and travel limitations (time and budget) while continually striving to deliver the highest level and quality of services to our customers and clients. DADS currently has no video conferencing capabilities, unlike our sister HHSC agencies. We are planning a pilot at two SSLCs (Mexia and San Angelo) to address the immediate issue of providers having to travel long distances to get to the facility and to reduce those associated travel costs for the agency (the Agency pays for provider travels). The pilot will also allow the opportunity for staff to become more familiar with the technology, and for an evaluation of multiple vendor solutions, in order for us to make the most informed decision for future needs and associated procurements.

Video conferencing will allow specialists to visually observe residents, consult, confer and respond timely in urgent situations. It will also reduce time and travel costs for meetings and conferences between executives, managers, and staff located across the geographic area of Texas and with executives in State Office in Austin.

B. Assessment of Fiscal Year 2010 - 2011 Efforts to Meet HUB Procurement Goals

**Attainment:**

In FY 2010, the agency attained or exceeded two of six, or 33% of the applicable statewide HUB procurement goals. In FY 2011, the agency attained or exceeded one of six, or 17% of the applicable statewide HUB procurement goals and increased special construction HUB dollars by \$4.9 million.

**Applicability:**

All procurement categories are applicable to the agency.

**Factors Affecting Attainment:**

In FY 2010 and 2011, the professional services goal was not met because the majority of these dollars are paid directly to medical professionals who have no incentive to become HUB certified; in other services, the majority of these dollars were paid to national locum tenen medical staff search firms, few or no locum tenen HUBs are available to meet the agency's need; in special and building construction the agency had difficulty locating HUBs in rural areas of the state. In fiscal year 2011, the commodities goal was not met because of the direct purchase of medical supplies and drugs from national pharmaceutical companies and their distributors.

**"Good-Faith" Efforts:**

Complied with statewide HUB procurement goals per 34 TAC Section 20.13( c), ensured that contract specifications, terms and conditions reflected the agency's actual requirements, were clearly stated, and did not impose unreasonable or unnecessary contract requirements; prepared and distributed information on procurement procedures in a manner that encouraged participation in agency contracts by all businesses; in FY 2010 and 2011, the agency reached out to HUBs by participating in 93 HUB forums throughout the state; and awarded 4,220 contracts to HUBs.

**Assumptions and Methodology:**

The Methodology for estimating federal funds are unique for each federal program that the agency receives funds for. For those programs where the agency is given a sum certain grant amount it is determined what the expectation is that the agency will continue to participate and what if any changes are anticipated at the federal level that would affect future revenue streams. If it is determined that no change is foreseen, then the most current notice of grant award (NOGA) amount is projected for FY 2009-11.

For those Federal programs that are based on the number of participating consumers and the corresponding rate of reimbursement for the particular service, financial staff work with agency programmatic staff (consumer changes) and agency Medicaid/Reimbursement staff (Rate changes) to construct estimated rate models for FY 2009-11.

Federal Funds that are for time limited projects are shown based on the NOGA for that project in the time frame outlined in supporting documentation and / or discussions with program staff responsible for the deliverable.

License Fees: Based on the fee rate of \$875 per parent and branch for initial, renewal and change of ownership licenses. Alternate delivery sites have a base fee rate of \$500 for initial and change of ownership and a \$300 fee rate for renewal. An increased fee is required for late submission. Fee rates may be raised as high as \$1,000 for each license. Above this amount, a statutory change would be required. Federal legislation does not govern these fees. Health care facility fees are projected to decrease; thus, revenues are reflected as such. Administrative Penalties: For fiscal year 2011, the agency collected an usually larger amount of penalties than prior years, and that trend is not expected to continue. The 2012-2015 projections are based on historical collections before 2011.
